Building Enclosure Consultant

Portland, OR and Philadelphia, PA

RWDI is a global engineering consulting firm, bringing our wide range of experience and skills together to develop a better, holistic solution for our clients. We share a fundamental dedication to earning the trust and exceeding expectations of our clients.

Are you looking for your next career move?

Are you drawn to analyzing and solving problems in a client focused, consulting environment?

RWDI is seeking **2 Building Enclosure Consultants** to join our team in our **Portland, OR** office or our **Philadelphia, PA** office. This team's current and active project portfolio is diverse and exciting. We deliver valuable insights on the maintenance and enhancement of existing structures, and support the development of new buildings – from early design stages through to on-site installation guidance and performance verification. We help clients tackle complex challenges in the built environment by combining innovative thinking, collaborative problem solving and a passion for expanding the boundaries of the possible.

The successful candidate will have at least **3 years of experience** in enclosure consulting, architecture, engineering, construction management, or related field. This is considered a junior to intermediate level position assisting and working under the supervision of more senior consultants.

This role includes but is not limited to:

- Observe construction and installation of building enclosure systems in the field, including review of mockups and observation of quality assurance testing.
- Conduct assessments of existing building enclosures
- Draft details for the building enclosure (AutoCAD and Revit)
- Review enclosure details and specifications prepared by our clients
- Assist clients with system selection for building enclosure
- Research building codes and industry standards
- Research enclosure systems and products for performance, compatibility, and durability.
- Local travel required. Occasional overnight travel required
- Physical aspects of job - climb ladders and stairs

We are accepting applications from candidates with the following qualifications:

- **3+ years' experience** in building enclosure design, review, and assessments rwdi.com

- A minimum of an Undergraduate Degree in architecture, engineering, or related field.
- Basic understanding of building science and how the building enclosure controls heat, air, and water.
- Ability to communicate technical concepts in straight-forward language
- Ability to work on multiple projects at once
- Experience with AutoCAD and/or Revit
- Other desirable skills and experience:
 - Familiarity with early to mid-20th century buildings
 - Familiarity with building performance modeling software
 - Familiarity with energy code
 - Familiarity with building commissioning
 - Construction or construction management

Compensation:

- Competitive Salary
- Bonus Program
- Learning Spending Account
- 401K Matching
- Fitness Allowance
- Group Benefits

Please submit your cover letter and resume at the following link:
