

Energy Engineering Consultant Position Available in Chicago

Goby, the leader in sustainability consulting and creator of the SeaSuite platform for commercial real estate, seeks a bright, talented, enthusiastic, and highly motivated individual with knowledge in the mechanical and energy engineering field with a focus on sustainability.

At Goby, the candidate would be responsible to work as a consultant providing green building services including but not limited to:

- building energy modeling with tools such as eQuest and Energy Plus
- ASHRAE Level I and II energy audits
- LEED project team contribution and documentation
- LEED project reviews
- ENERGY STAR consulting and data management

A strong candidate for the position could demonstrate the following skills, accreditations, and/or willingness to develop the following:

- engineering or architectural degree
- sustainable design focus or degree
- PE, EIT, and/or CEM
- LEED AP
- direct experience with at least 10 energy models
- excellent interpersonal skills
- strong verbal and written communications skills
- strict attention to detail, organization, and quality standards
- ability to interact well with a range of clients and other professionals
- an ambitious and entrepreneurial attitude and independent and adaptable worker
- creative thinker and problem-solver with a positive attitude
- skilled with standard Microsoft software applications (Excel, PowerPoint, Visio, Project)
- willingness to travel

Information about the position:

- office located in downtown Chicago
- salary will be in line with 3 to 10 years of experience in field
- medical and dental benefits will be offered as well as an available 401K
