

The BEMS research team (“Building Energy Monitoring and Simulation”) is offering a position of

PhD candidate

The proposed research is concerning the environmental performance of buildings and more specifically the introduction of calculation models of some aspects of the environmental performance in a building energy simulation software (TRNSYS).

The research will take place in collaboration with CRTE (« Centre de Recherches en Technologies Environnementales »), which is part of Centre de Recherches Public Henri Tudor (based in Esch-sur-Alzette, Grand-Duché de Luxembourg).

Duration of the grant : 3 to 4 years

Profile : Master in Environmental Sciences and Management, Civil Engineering, Bio-Engineering or similar diplomas
